+hyllis3 I wanted to investigate the possibility of archiving our records. Bill, "a la Casa Grande, Amy Brock and I met with Heather, Richmond University archivist. We are going to work toward establishing an archive. We will save the archives the paper and electronic records we have now. Then, every two years we will move the minutes, etc. from the Council website to the archives, where they will be archived in a searchable format & " ? " or C " \*4

+hyllis3 I'd also like to have a website master for this council. Perhaps the professor could have a grad student in Computer, etc. for the website master for the various Senate Councils.

+hyllis3 The committee that met with Heather will meet with the professor to discuss our concerns about archives, etc. of our council.

+hyllis3 All we want is totals from the departments, as reported numbers, related to the goals. I will make sure you know this. As regards our next meeting, we need to think about what we do with the numbers. I assume we are reporting to faculty senate. I assume we will take the numbers by area, not by departments.
